

Gizmo (650 VA)

Salient Features:

- High end processor controlled.MOSFET based technology provides a rugged and reliable power back up solution.
- Start of the art MOSFET based technology with greater efficiency and dynamic stability.
- Wide input voltage range provides proper battery charging at low input voltage.
- Highest charging current in its class.
- Battery deep discharge and overcharge protection.
- Reverse Phase protection.
- Surge load capacity highest in its class.
- Inverter to main changeover at zero crossing.

Application:

- Power Backup for households as well as for computers.
- Small Water Pump and all motor based small applications.
- TV sets,Fans,Tube lights etc.
